

Silicon Motion Technology Corporation (NasdaqGS: SIMO) is the global leader and pioneer in developing NAND flash controllers for solid state storage devices. We have the broadest portfolio of controller technologies and solutions, and in the last 10 years, we have shipped over five billion NAND controllers, more than any other company in the world.

Our primary products are controllers used in embedded storage products such as SSDs and eMMCs, which are widely used in consumer devices such as smartphones, tablets and PCs and for enterprise, industrial, commercial and other applications. Our customers include most of the NAND flash makers, leading technology OEMs, and the majority of storage device module makers. More NAND flash components, especially next-generation flash, produced by Intel, Micron, Samsung, SK Hynix, Toshiba and Western Digital are supported by Silicon Motion controllers than any other company.

We are the world's leading merchant supplier of controllers for eMMC embedded memory used in smartphones and tablets, and the leading merchant supplier of controllers for SSDs used in PCs and other client devices.

We also supply customized specialty SSD solutions for the Chinese hyperscale data center market and for high-performance industrial applications.

We market our controllers under the "SMI" brand, enterprise-grade SSDs under the "Shannon Systems" brand and single-chip industrial-grade SSDs under the "Ferri SSD" and "Ferri-eMMC" brands.

We were founded in 1995 in San Jose, California and now operate from corporate offices in Hong Kong, Taiwan and the US.

## Quick Facts

<b>Founded</b>	1995
<b>IPO</b>	2005
<b>NasdaqGS</b>	SIMO
<b>Employees</b>	1,122 ( 2016 year-end )
